

1) Read your stock file – With the car “Off” plug the tuner into your OBD2 diagnostic port (use the cable included). The OBD2 diagnostic port is located below the steering wheel.

Turn the key to the “ON” position but **do not** start the car.

Press the “Next” button on your tuner until the display reads
“Read 1
E78”

Press the “Ok” button to begin reading the file. The display will show a progress bar and will prompt you to turn the key to the “Off” position when it is finished. Press the “Ok” again and it will run a count-down timer to allow the computer in the car to reset before you start the engine.

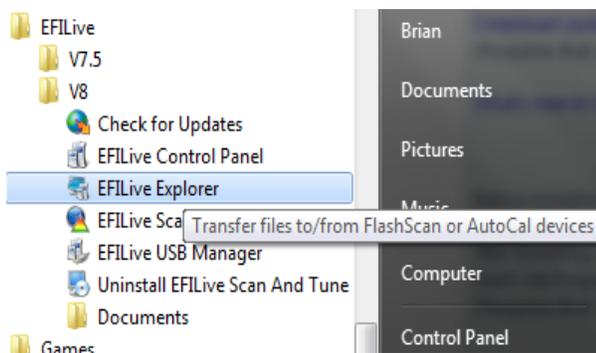

2) If you have an automatic transmission, repeat the same procedure, but this time select
“Read 1
T76”
to read the stock transmission file.

Unplug the tuner from the car and connect it to your computer using the USB cable.

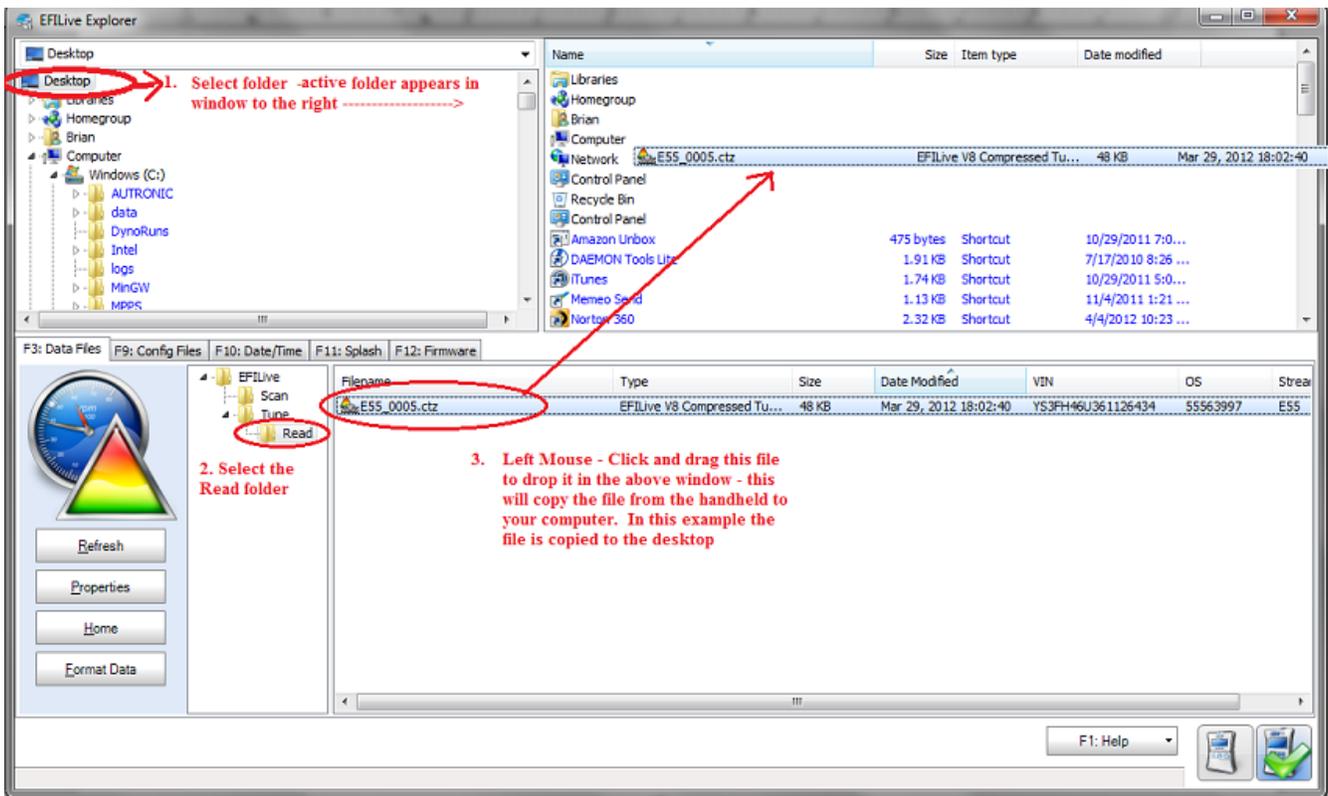

3) Download and Install EFILive V8 software:

(http://www.efilive.com/index.php?option=com_content&view=article&id=48&Itemid=133)

Open EFILive V8 Explorer:

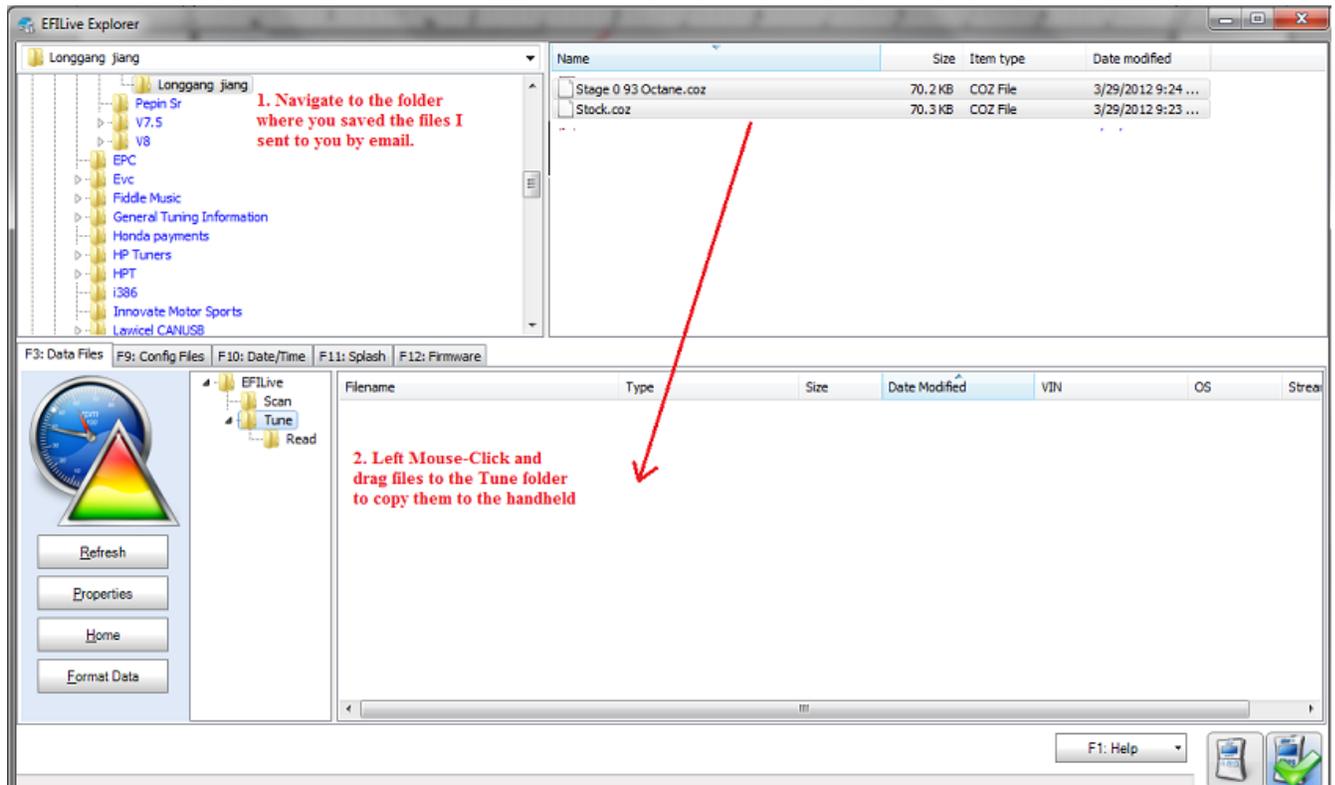

3) Copy files from the handheld to your computer and email the files:

Email the E78_000X.ctz and T76_000x.ctz files to vermonttuner@yahoo.com.

4) I will email to you the new tune files within 24hrs. Once you receive the new files, open EFLive Explorer again and copy the new files to the Tune directory:

5) Unplug the handheld from your computer and go to your car.

To flash a new calibration file – With the car “Off” plug the tuner into your OBD2 diagnostic port. Turn the key to the “ON” position but **do not** start the car. Press the “Next” button on your tuner until the display reads the calibration you would like to install:

Example:

Prog 1

Stage 0 98 RON

Press the “Ok” button to begin writing the file. The display will show a progress bar and will prompt you to turn the key to the “Off” position when it is finished. Press the “Ok” again and it will run a count-down timer to allow the computer in the car to reset before you start the engine. If you are tuning the auto transmission just repeat the process and select the T76 calibration you would like to flash.

Thats it – just unplug the tuner and enjoy the new power!

Cheers,

Brian Blair
